- Mixed-integer programming
  - Traveling salesman problem
  - Portfolio optimization

# Overview of mathematical optimization

## Mixed-Integer Programming (MIP)

$$\max f(x)$$

$$s.t. g(x) \le 0$$

$$x \in \mathbb{R} \times \mathbb{Z}$$

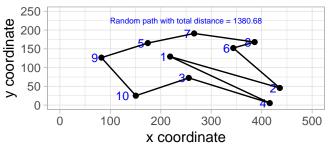

## Portfolio Optimization

### Traveling salesman problem (TSP)

#### ■ TSP wikipedia page

The travelling salesman problem (TSP) asks the following question: Given a list of cities and the distances between each pair of cities, what is the shortest possible route that visits each city exactly once and returns to the origin city?

#### TSP example with 10 cities

## Formulate TSP as a MIP
